

## Stamford Bus Maintenance Facility Improvements Stamford, Connecticut

---

**Description** For the Connecticut Department of Transportation and under contract to an architectural design firm, FHI prepared an environmental assessment for the expansion and improvement of a bus maintenance and storage facility in Stamford, Connecticut. FHI prepared the environmental document under the environmental guidelines of the Federal Transit Administration (FTA). Key issues included access, traffic, land use, and community impact. As part of the process of documenting existing conditions, FHI became familiar with transit routes in Stamford and the overall structure of the local transportation system.

**Client** Connecticut Department of Transportation
