

## Capital Community Technical College Site Evaluations Hartford, Connecticut

---

### **Description**

As part of a project team under an on-call contract with the Connecticut Department of Public Works, FHI contributed to the environmental screening and subsequent drafting of an environmental assessment of potential sites for the relocation of the Capital Community Technical College (CCTC) to downtown Hartford. The screening and environmental assessment were conducted consistent with requirements of the Connecticut Environmental Policy Act (CEPA). FHI was responsible for the evaluation of impacts of the project in terms of air quality, noise, cultural and archeological resources, neighborhood impacts, environmental justice, and consistency with local, regional, and state planning policy and documents.
