

## Hartford Neighborhood Renaissance Zones Hartford, Connecticut

---

### Description

FHI is part of a team developing neighborhood redevelopment and improvement plans for sixteen neighborhoods with the City of Hartford. Through GIS, FHI is developing a map catalogue of existing conditions within each of the neighborhoods. Within each neighborhood, existing land use, historical/cultural issues, development opportunities and zoning regulations were entered into a GIS database. Maps based on these issues were produced and included in the neighborhood improvement plans for each of the sixteen neighborhoods.

### Client

Metropolitan District Commission
