

Naval Atlantic Fleet Headquarters Master Plan Norfolk, Virginia

Description

FHI was part of a project team developing a master plan for the naval base compound that is home to the Naval Atlantic Fleet Headquarters and a NATO facility in Norfolk, Virginia. The project concept was to develop a campus type atmosphere that satisfies the operational requirements of the various groups on the compound. FHI's role was to evaluate the parking and traffic issues related to the master plan, the primary issue being access from the local transportation network. Additional analyses were performed to evaluate the parking requirements and the subsequent effects of over 3,000 garage and surface parking spaces on internal traffic circulation.
