

Boston to Montreal High Speed Rail Feasibility Study

Description

FHI is part of a consultant team coordinating the public outreach efforts for the Boston to Montreal High Speed Rail Feasibility and Planning Study. FHI's role on the project includes development of the study website (www.bostonmontrealhsr.org), arranging public meetings, and facilitating focus group meetings. FHI is also responsible for press releases and coordinating press coverage for the study. The study is being sponsored by a three-state partnership between Vermont, New Hampshire, and Massachusetts in conjunction with the Federal Railroad Administration.

Client

Vermont Agency of Transportation
