

## University of Virginia North Grounds Transportation Synthesis Review Charlottesville, Virginia

---

### **Description**

The referenced transportation study was sanctioned by the University of Virginia to determine the combined transportation impacts of several new development initiatives – a new arena, an arts district, a parking garage and a new transportation facility on new alignment. FHI, in association with MMM, performed an independent review of the referenced study on behalf of the City of Charlottesville. The study approach, assumptions, methodology and technical procedures were reviewed for validity and accuracy.

### **Client**

City of Charlottesville
