

Petersburg Multimodal Facility

Petersburg, Virginia

Description

In phase one of this project, FHI, as a sub to Wendel Duchscherer, will develop a comprehensive environmental assessment (EA) of a proposed bus facility in Petersburg, Virginia. FHI's role is to provide an EA which meets FTA, state, and local criteria as necessary for gaining approval for the proposed bus facility. To facilitate this process, FHI will develop and maintain a project website, conduct public meetings, perform comprehensive environmental surveys for the site and surrounding area, and shepherd the environmental document through the approval process. The project site will serve interstate, intercity, and local bus service for the city and Region.

Client

City of Petersburg, Virginia
