

Three Rivers Community College Consolidation Norwich, Connecticut

Mohegan Campus

Norwich Campus

Description

Under an on-call environmental services agreement with the Connecticut Department of Public Works (DPW), FHI was tasked with overseeing the Connecticut Environmental Policy Act (CEPA) documentation and compliance process for consolidation of the Three Rivers Community College (TRCC). This entailed review of the Environmental Impact Evaluation (EIE) prepared by another consultant to ensure that statutory requirements for the environmental documentation were met, including content and coordination requirements. The TRCC Consolidation proposed the merging of two campuses at one site to streamline and enhance the College's facilities and programs. Another of FHI's roles was to facilitate communications among DPW project managers, the sponsoring College's board of trustees, other environmental consultants, and other state agencies.
