

I-93 Transit Options New Hampshire

Description

FHI is involved with a project to evaluate transit investment options along the I-93 corridor from Manchester, New Hampshire to Boston, Massachusetts. FHI's role involves coordination of the public involvement program. As part of this program a series of stakeholder meetings, public meetings, community forums are being conducted throughout the study area. Additionally, FHI is developing a series of outreach materials including project newsletters, brochures and a project website.

Client

New Hampshire Department of Transportation
